PROBLEM STATEMENT

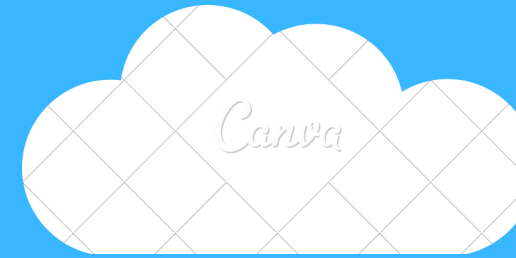

Brief 2: Building Memories Together

Managing shared expenses and bills
can be annoying!

Pain Points

Lack of transparency
Tracking payments can be difficult in large groups
Delayed or missed payments

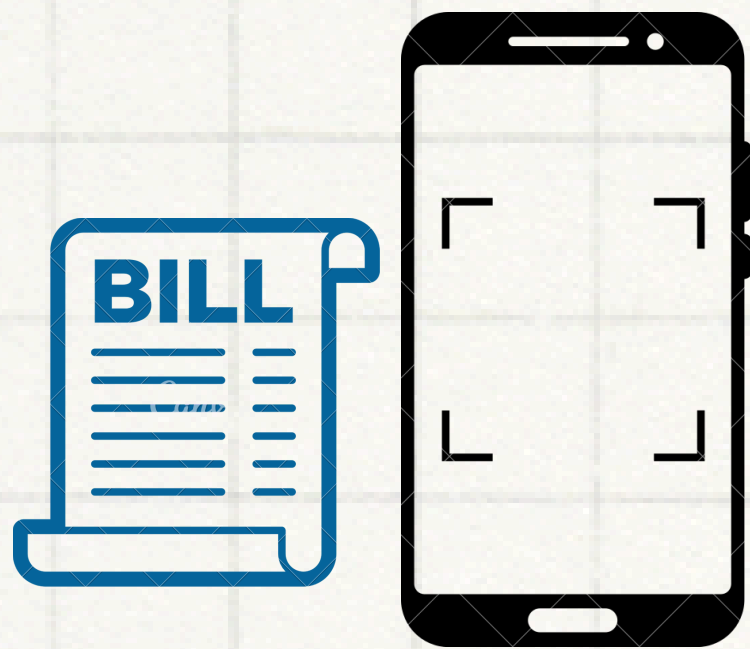

Existing Solutions

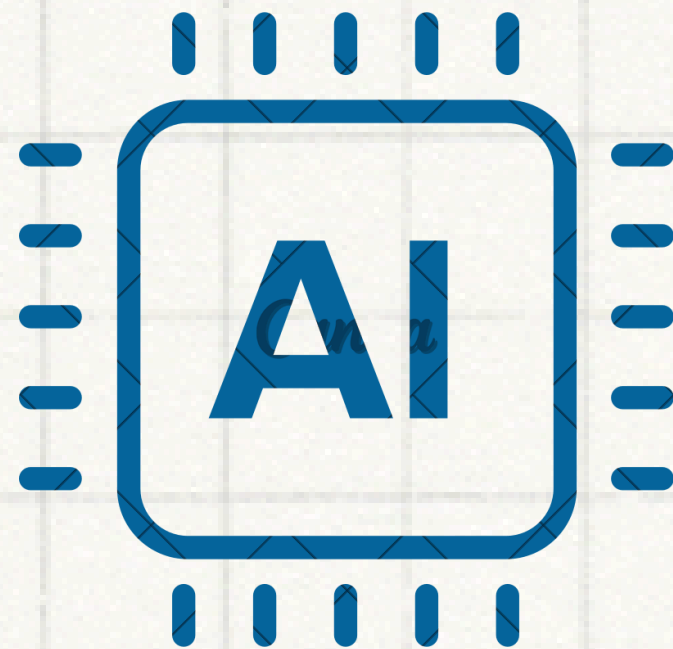

venmo

OUR SOLUTION

Scan the receipt

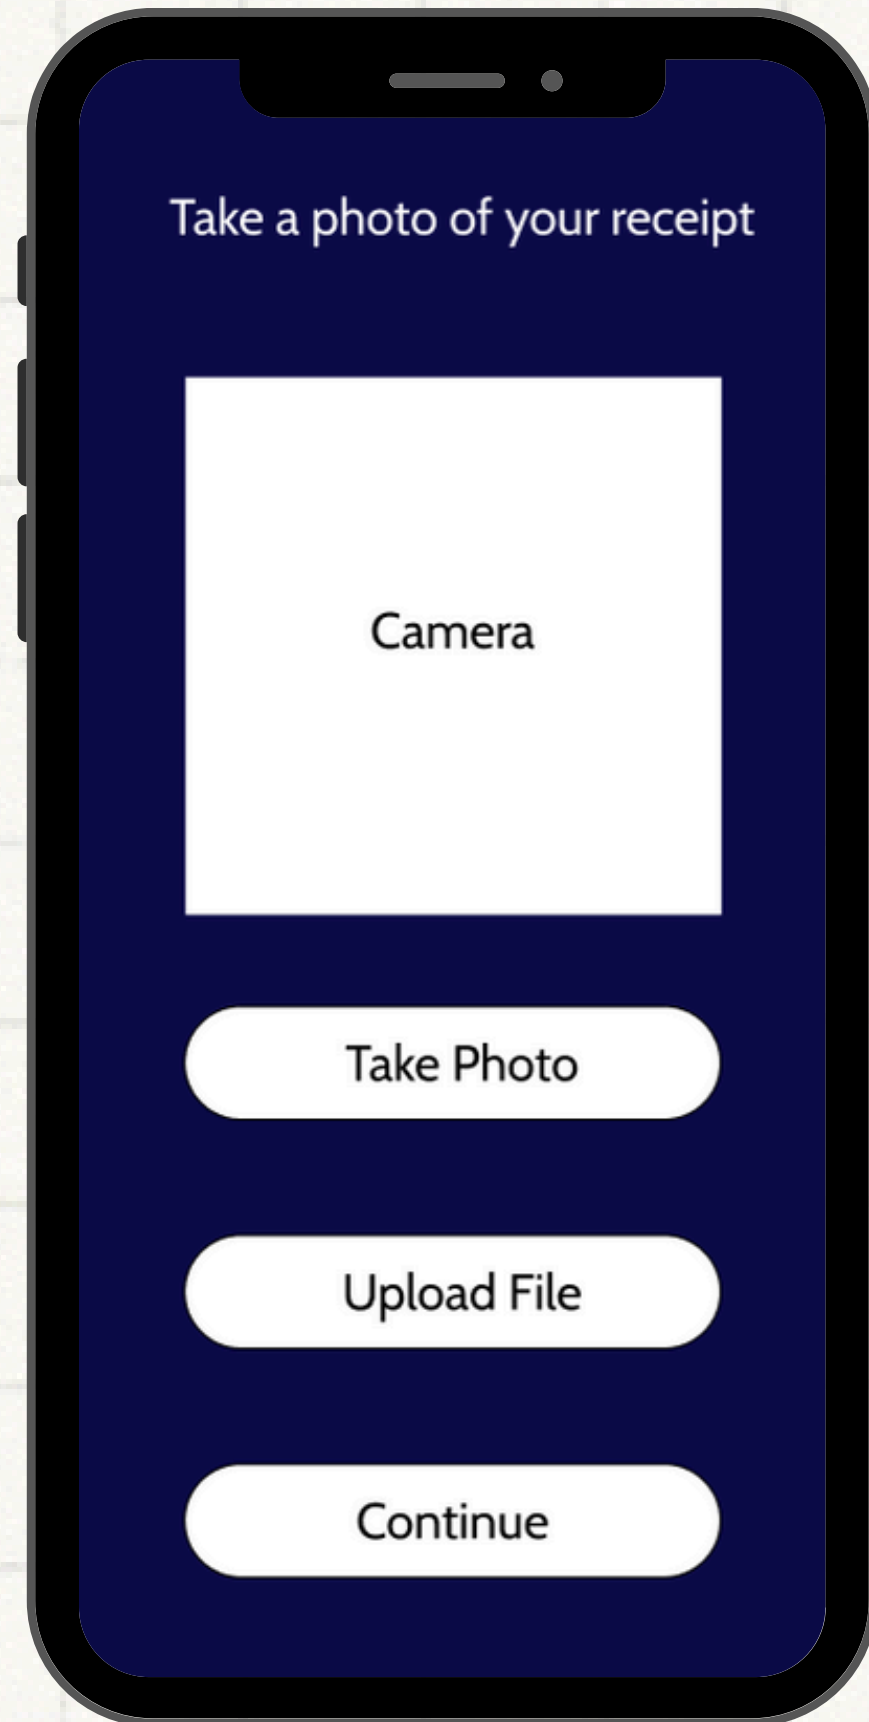

Generate a digital receipt
utilizing GPT-4o

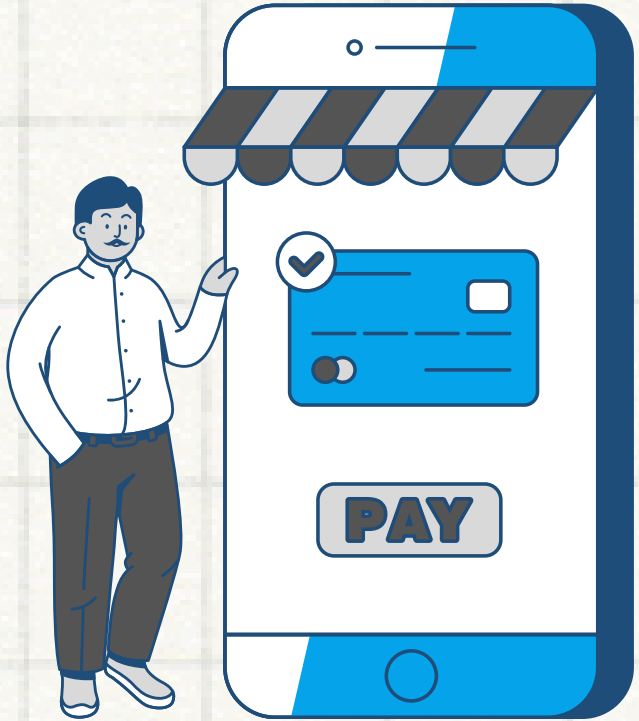

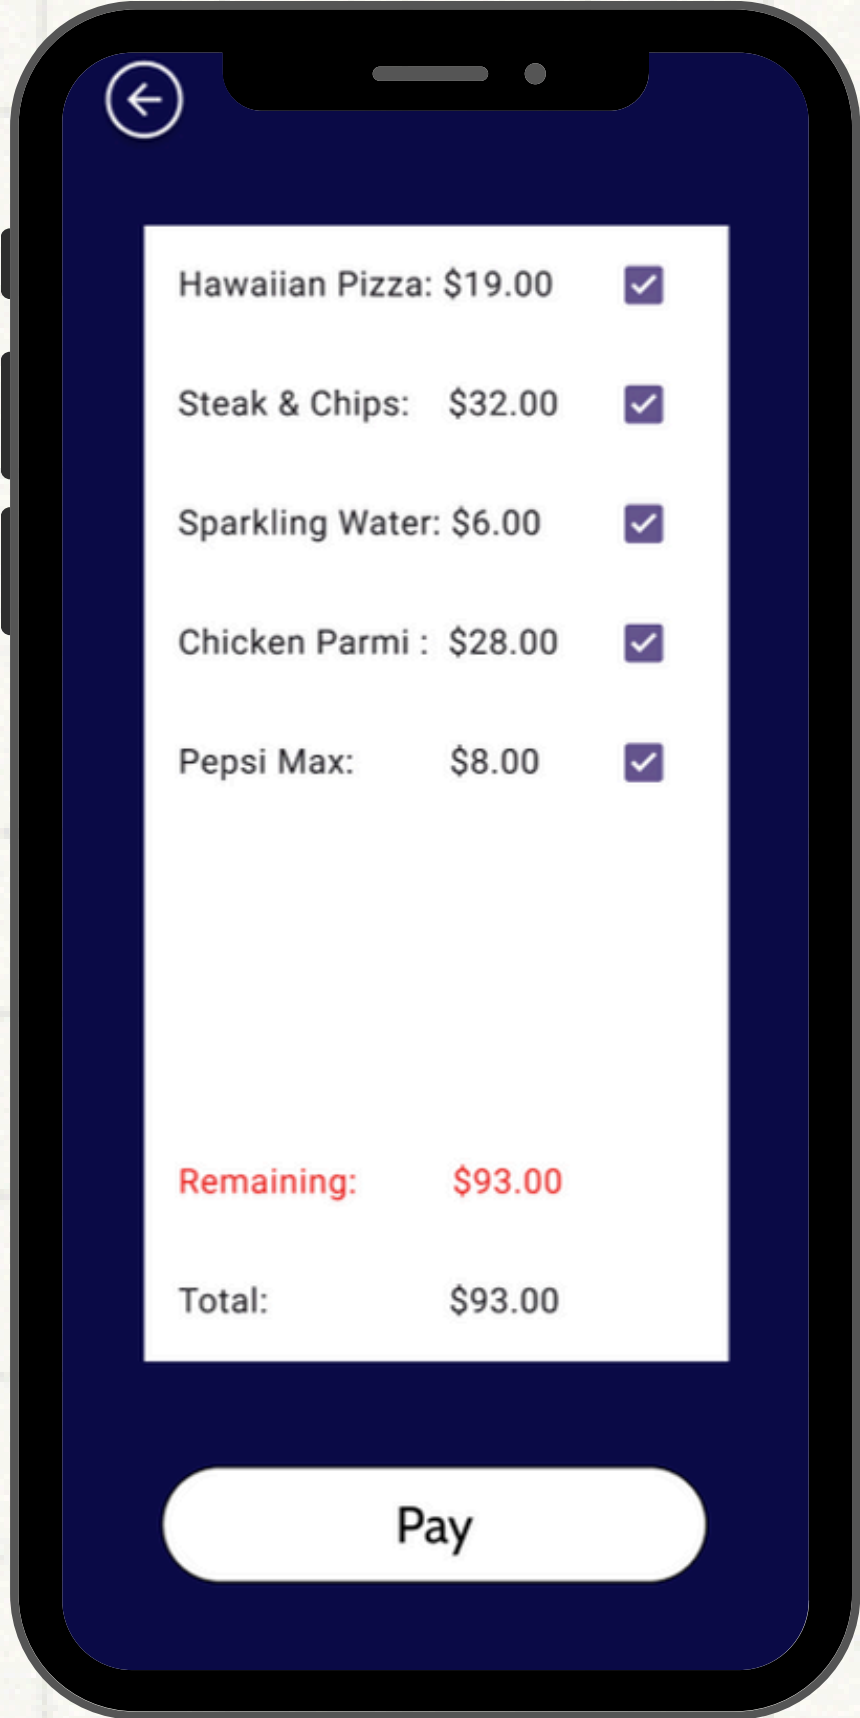

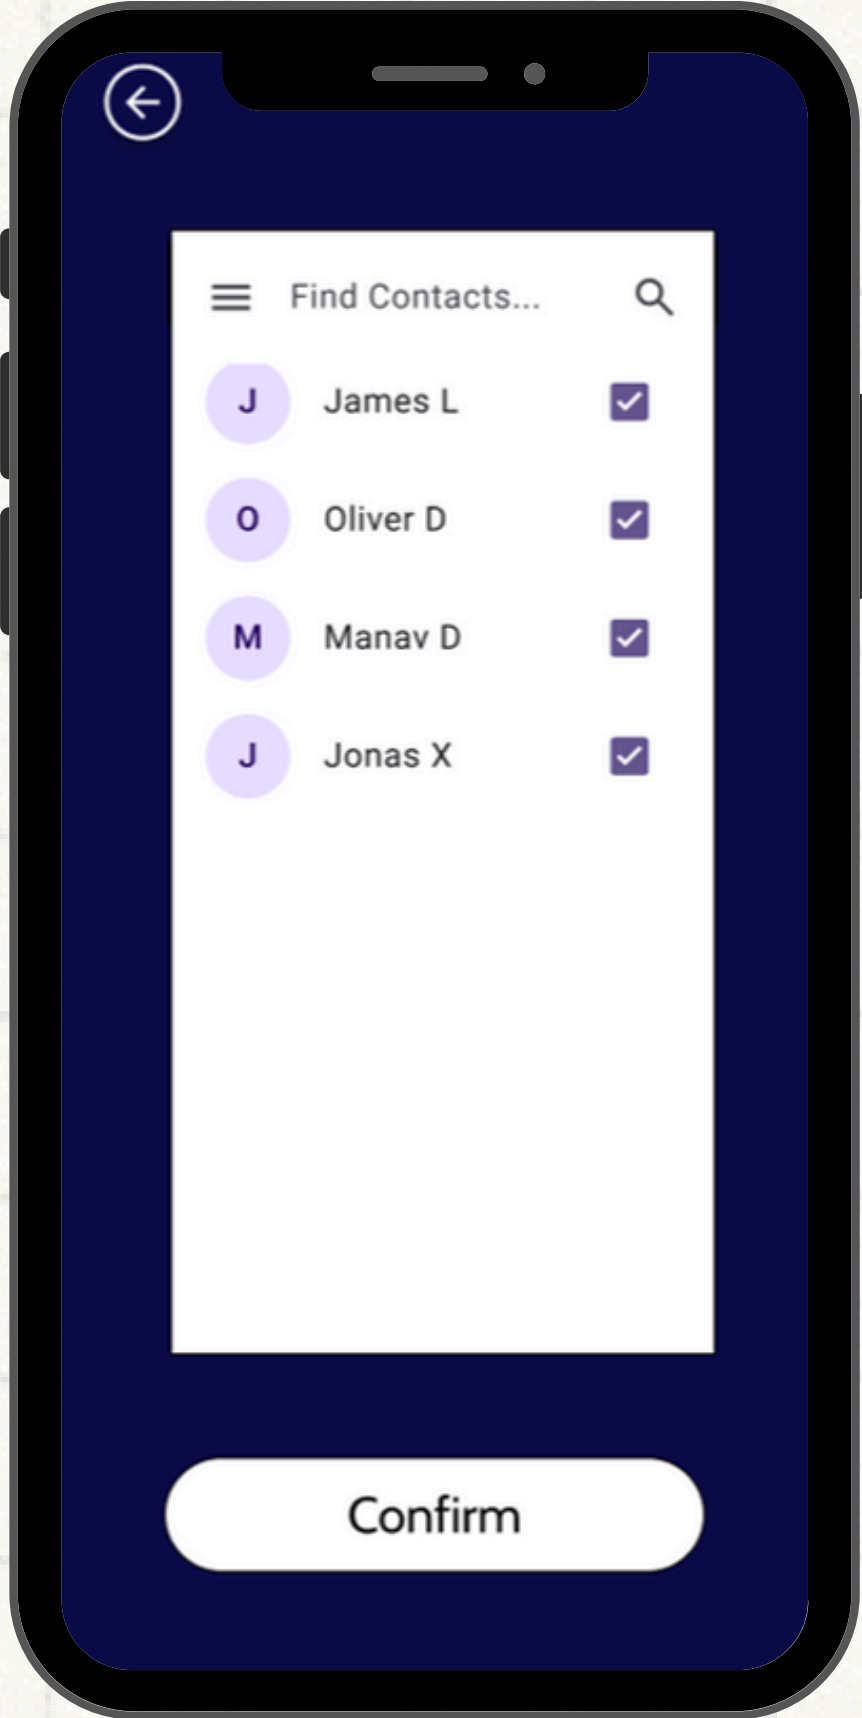

Everyone knows their share
and transfers the money

IMPLEMENTATION

Concerns

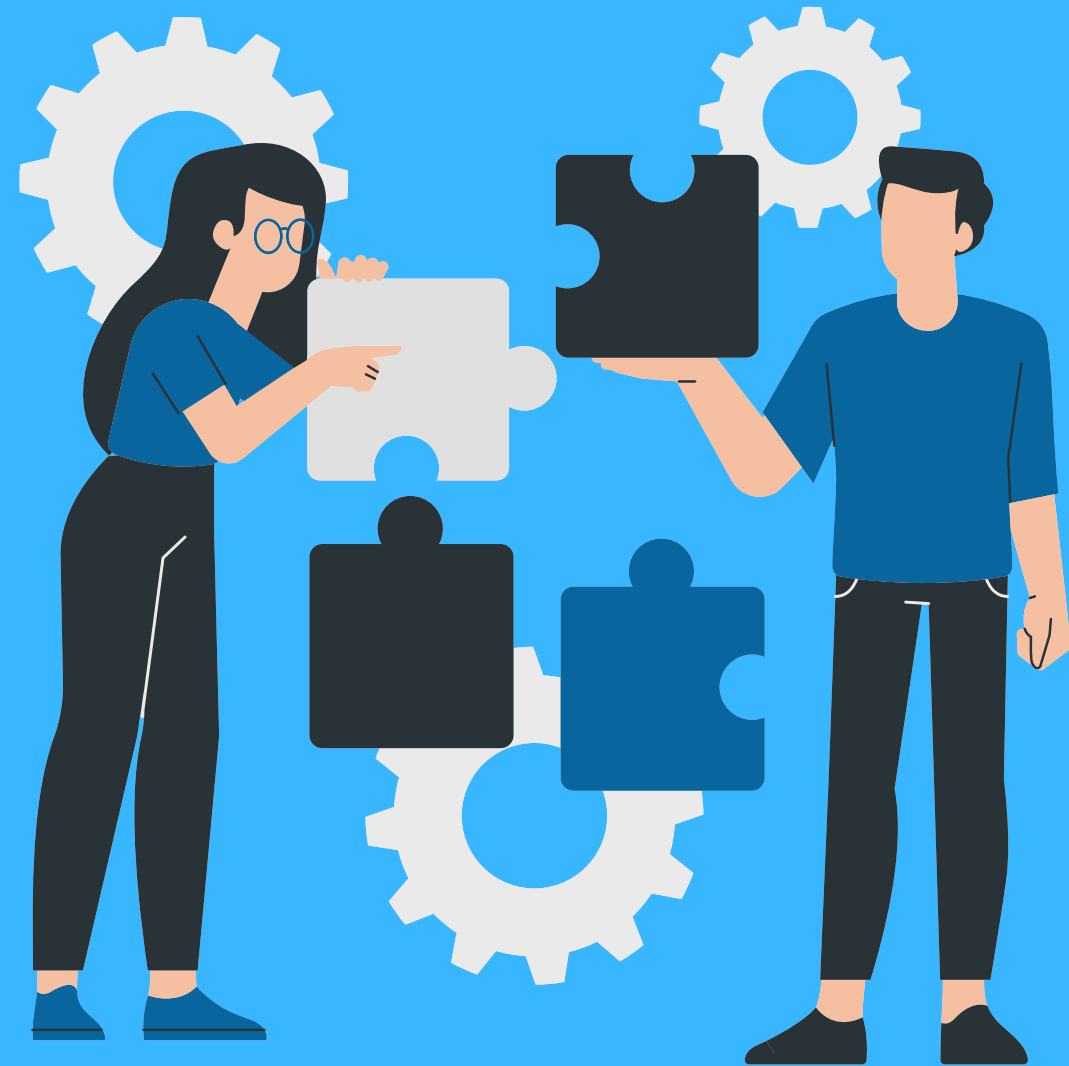

- Market shift from paper receipts to digital ones
- Life expectancy of the program
- AI Technology is not always accurate!

Potential Next Steps

- Iteration and function extension
- Conduct additional customer research
- Optimise OpenAI vision capabilities

FUTURE RECALIBRATION

Possible Extensions

- Come into use in more scenarios
- More features implemented
 - Multiple receipts
 - Integration with other Digital Menu Apps
 - Old receipts stored and analysed
- Personalised promotion strategies based on historical data
 - Cooperation with shoppers
 - Both customer and business can benefit

FUTURE RECALIBRATION
